

Richway Biomat

The Richway Biomat is a thermo-electrotherapeutic mat which produces far infrared rays and negative ions. Far infrared rays are a form of light energy beyond the visible light spectrum. They penetrate deeper into the tissue than regular heating devices thus affecting a positive, longer lasting effect than local or superficial heat applications.

During a Biomat massage treatment, the Biomat is placed on the massage table underneath the draping, much like a table warmer. Apart from the sensation of warmth/ heat, you will not feel the Biomat; the table will feel the same as a regular massage.

The mat does not heat the table, **it heats your body.**

The heat is felt within 5-10 minutes and will adjust to your body depending on the temperature setting. The settings will be discussed prior to your treatment. The mat does not need to be turned to full potential for you to receive the benefits of the infrared energy (unless a sweat is desired).

Contraindications and Cautions

- Atherosclerosis, arteriolosclerosis
- Hypertension (if not regulated or monitored)
- Kidney disease
- Advanced diabetes
- Diabetes is a caution if neuropathies are present
- Conditions with sensory or motor nerve involvement
- Acute injuries
- Hemophilia (caution unless physician has provided a medical note)
- Severe varicose veins
- Acute inflammation or hemorrhaging
- Pitting edema
- Burns
- Conditions with heat sensitivity (with caution)
- Advise therapist of medications taken regularly or on the day of your appointment
- Richway has also provided a list of contraindications and cautions, see link below:
